### **Emerald Wave® Sweet Bay**

*Laurus nobilis 'Monem'*

Height: 8 feet

Spread: 4 feet

Sunlight: ○ ●

Hardiness Zone: 8a

Other Names: Bay Laurel, Bay Leaf

#### **Description:**

A robust selection, producing narrow, leathery, emerald green foliage with wavy margins, that can be used as a culinary herb; may be pruned and maintained to any shape and size; a stunning accent plant for a bright indoor area

#### **Features & Attributes**

Emerald Wave Sweet Bay's attractive glossy narrow leaves emerge chartreuse, turning green in color with curious grayish green undersides throughout the year on a plant with a pyramidal habit of growth.

This is a multi-stemmed evergreen houseplant with a distinctive and refined pyramidal form. This plant can be pruned at any time to keep it looking its best.

#### **Planting & Growing**

When grown indoors, Emerald Wave Sweet Bay can be expected to grow to be about 8 feet tall at maturity, with a spread of 4 feet. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 60 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

## Design+Build

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

*-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --*
